

WHY

CHOOSE OPG+

OIL+PETROLEUM+GREASE CLEANUP

Customer Service & Communication

We know that a professional, courteous, and friendly approach can make a stressful situation more manageable. Our knowledgeable team members explain the process, answer your questions, and keep you informed throughout the cleanup. We offer live demos, which is important to us that clients see how amazing this formula is with their own eyes.

Low Cost & High Value

Cost is an understandable consideration for businesses and property owners, which is why we offer free quotes within our service area. Our remediation services offer an incredible value at a competitive price. Our methods are capable of restoring property and surrounding environment faster than other cleanup methods, at a fraction of the cost.

Speed of Response

In oil spill situations, time is of the essence. The quicker the response, the lesser the environmental damage and associated costs. Our OPG+ Quick Response Team is available 24/7 for cleanup emergencies or scheduled jobs. Our team strives to arrive at cleanup sites with a 1-hour ETA of a customer's call.

Environmental Commitment

Oil spills pose a significant risk to the environment, which can actually be made much worse by chemicals intended to remediate them. OPG+ offers an all-natural, environmentally-friendly alternative. Our biodegradable formula and cleanup methods eliminate oil, petroleum, and grease spills at the molecular level without harming the surrounding ecosystem.

Local Knowledge

Familiarity with the surrounding area is invaluable in oil spill cleanups. OPG+'s in-depth knowledge of the specific environmental and regulatory landscape of Florida and Georgia means that we can navigate the cleanup process more effectively. We understand local wildlife, ecosystems, and compliance with state-specific environmental regulations.

Expertise & Experience

OPG+ holds many certifications, including a listing on the US Environmental Protection Agency's reaction plan for oil spills. The Occupational Safety and Health Administration have also given us their seal of approval. Our technicians have a proven track record in handling a wide range of remediation projects.

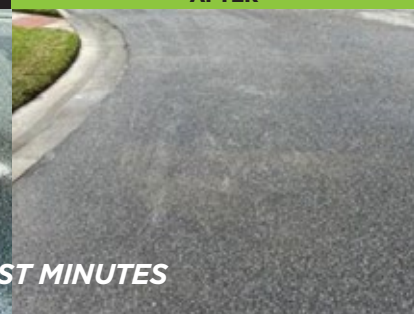

We Come to You

Waste Management • Construction
